

## Long Lifespan Slip Ring

- The Long Lifespan Slip Ring refers to the part that enjoys replaceable design. The damage prone components of the new unit adopt scientific modular design, which allows ease of taking apart or installation without requiring disassembling its housing. Quick and convenient replacement of internal parts is conducive to prolonging its service life.

### Features

- ◆ Transmit current and signal including Gigabit Ethernet, USB, CANBus, and serial signals
- ◆ Modular structure equipped with access hole
- ◆ Good figure with a stable strength

### Advantages

- ◆ Optional circuit number
- ◆ Customizable ID, OD and thickness
- ◆ Technical support

Part #	Ring #	ODxL(mm)	Voltage(V AC)	Current(A)	Signal
GK032-0802	8		220 VDC/AC	2A	/
