

REC35 SERIES

High Voltage Contactors

500A CONTINUOUS DUTY 1000V SYSTEM VOLTAGE

FEATURES

SPST Normally Open High Voltage Contactors

- Hermetic seal with gas fill
- Optional auxiliary contacts for main position feedback
- Integrated coil economizer to reduce coil holding power
- Meets RoHS 2011/65/EU
- CE certified
- UL recognized (File E536110).
 Please refer to UL file for specific part numbers that are recognized

PERFORMANCE

TABLE 1. SPECIFICATIONS			
CHARACTERISTIC	MEASURE		
Contact Arrangement	Form X, SPST NO		
Max Switching Voltage	1000 VDC		
Dielectric Withstand Voltage Contacts to Coil	2,200 VAC, 1 minute		
Dielectric Withstand Voltage Across Open Contacts	4,000 VDC, 1 minute		
Continuous Current (2 x 127mm ² conductor)	500A		
Overload Current 1 minute	1,000A		
5 Minutes	650A		
Make and Break	See table		
Max Short Circuit Current -1 second	3,000 A		
Min Insulation Resistance	1,000 Mohm @ 1,000V		
Contact Voltage Drop (Max)	125mV @ 250A		
Operate Time (Max, incl bounce)	25ms		
Release Time (Max)	12ms		
Shock - Functional, 1/2 Sine, 11ms	20G		
Shock – Destructive, 1/2 Sine, 11ms	50G		
Operating Temperature	-40°C to 85°C		
Ingress Protection	Exceeds IP69, (Hermetically sealed)		
Mechanical life	500,000		
AUXILIARY CONTACTS	MEASURE	MEASURE	
Contact Arrangement	SPST	SPST	
Continuous Current	2A		
Minimum Current	1mA @ 12V		
COIL (all data at 20°C ambient)	J, K, L coil options	M, N coil options	
Nominal Voltage		32-95V	
Pick-up Voltage (Max)		32 VDC	
Drop-out Voltage (Min)		18 VDC	
Inrush Current (Max), 130ms max duration		1.3A	
Holding Current	0.17A @ 12 VDC 0.09A @ 24 VDC	0.05A @ 48 VDC	

NOTE – Current carry performance is highly dependent on conductor size and ambient temperature. Below graph is an example using 120mm² conductor at 85°C ambient

TABLE 2. RESISTIVE LOAD SWITCHING (MAKE / BREAK DATA) POLARITY SENSITIVE VERSION			
VOLTAGE	CURRENT	CYCLES 1 cycle = 1 make + 1 break	
450V	250A	5,000	
650V	250A	200	
1000V	300A	1 Cycle, BREAK only	
BI-DIRECTIONAL VERSION			
VOLTAGE	CURRENT	CYCLES 1 cycle = 1 make + 1 break	
450V	250A	5,000	
650V	250A	200	

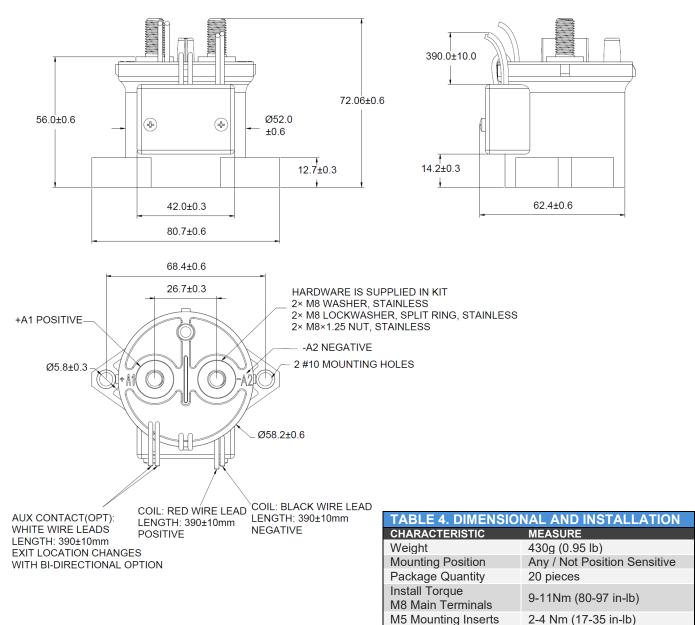

OPTIONS

TABLE 3. PRODUCT NOMENCLATURE				
	CONTACT POLARITY	MOUNTING	COIL	AUXILIARY CONTACTS
REC35	_	1 Bottom Mount	J 9-36V integrated PWM	X None
	B Bi-directional		L 9-36V external PWM ¹	A Normally Open
	D. Delevity Constitute		M 32-95V integrated PWM	B Normally Closed ²
	P Polarity Sensitive		N 32-95V external PWM ¹	

¹ Requires customer to provide PWM control and a fast drop-out circuit for the coil (See AN0001) ² Normally Closed auxiliary contacts only available on polarity sensitive version

	CONTACT POLARITY	MOUNTING	COIL	AUXILIARY CONTACTS
REC35	P Polarity Sensitive	1 Bottom Mount	K 9-36V internal PWM	X None

PRODUCT DIMENSIONS [mm]

NOTES

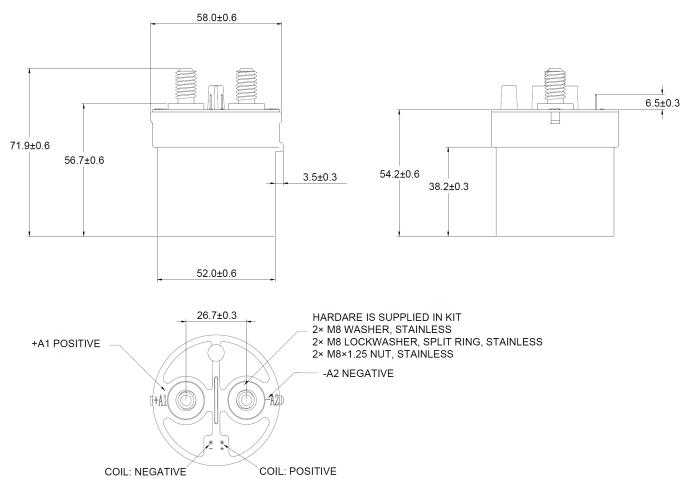

• Auxiliary contacts are not an option for the REC35 version with internal economizer (K coil) or the PCB mountable version.

PCB Mountable Version

TABLE 6. PRODUCT NOMENCLATURE				
	CONTACT POLARITY	MOUNTING	COIL	AUXILIARY CONTACTS
REC35	P Polarity Sensitive	3 PCB mount	₭ 9-36V internal PWM	X None

PRODUCT DIMENSIONS [mm]

NOTES

- Polarity Sensitive versions are marked +A1 and -A2 for the power terminals. For applications that require the contactor to
 open under load, please ensure current is flowing from the +A1 to the -A2 terminal. For Bi-Directional versions the direction of
 current does not matter when breaking under load.
- Contactor is operated by a coil that changes resistance with temperature: Maximum coil voltage will be lower than indicated at temperatures above 25°C, and higher than indicated at temperatures below 25°C.
- Nominal Coil Voltage for Pick-up Current, Coil Current and Coil Power specifications, Current/Wattage will be lower than
 indicated at temperatures above 25°C and higher than indicated at temperatures below 25°C.
- Pick-up Voltage and Drop Out Voltage will be lower than indicated at temperatures below 25°C and higher than indicated at temperatures above 25°C.
- Attached cables and busbars directly to the main terminal pad using the recommended install torque. Do not use washers or other materials between the contactor and the conductor. This will ensure the lowest possible contact resistance.
- Avoid excessive coil voltages. Exceeding the ratings on the datasheet may result in high coil temperature and coil failure.
- Contactor may be used above Max Switching Voltage if the application does not require significant load breaking. Please contact Rincon Power to discuss in more detail.
